teleflex.com

Teleflex is a global provider of medical technology designed to enable healthcare providers to protect against infections and improve patient and provider safety. A trusted resource and partner for our customers, we specialize in products for vascular access, respiratory care, general and regional anesthesia, cardiac care, urology and surgery. Teleflex also provides specialty products for device manufacturers.

SUPPORT FOR HOSPITALS

Hospitals around the world rely on Teleflex products. Our products are used in a wide range of critical care and surgical procedures. Our highly motivated employees and dedicated sales and delivery network ensure that the right product is in the right place at the right time.

SUPPORT FOR CLINICIANS

As your partner in healthcare, we offer:

- A broad variety of clinical education programs
- A multi-disciplinary team of clinical specialists
- Resources for health care providers, including our First Do No Harm website (firstdonoharm.com)

OUR PRODUCTS

VASCULAR ACCESS

Teleflex offers a broad selection of central venous catheters, including peripherally inserted catheters, sheath introducers, dialysis access products and specialty catheters—all under the ARROW brand name. Our unique ARROWg⁺ard Blue[®] antimicrobial surface treatment is designed to help reduce bacterial colonization that can lead to catheter-related bloodstream infections, and we've expanded antimicrobial protection options with our ArrowEVOLUTION[™] with Chlorag⁺ard[™] technology, the first chlorhexidine-treated peripherally inserted central catheter.

REGIONAL AND GENERAL ANESTHESIA

We provide regional and general anesthesia devices under our ARROW and RUSCH brand names, including a full line of spinal anesthesia, epidural anesthesia and peripheral nerve blocks in single shot needle and continuous catheterization approaches. We offer RUSCH laryngoscopes and blades, SHERIDAN and RUSCH endotracheal tubes and the innovative ISIS[®] HVT[™] convertible endotracheal tube.

RESPIRATORY CARE

With our HUDSON RCI product portfolio, we offer a comprehensive line of respiratory care products for oxygen and aerosol therapy, humidification, non-invasive ventilation and intubated ventilatory support. Our RUSCH products include a complete line of breathing circuits. These are complemented by our highly efficient GIBECK filters. Each product is designed to focus on clinician efficiency and therapeutic efficacy, whether used in the acute care, alternate site or home care setting.

SURGERY

Our surgical products and medical devices include WECK ligation, DEKNATEL sutures, PILLING general and specialty instrumentation, TAUT laparoscopic access ports and cholangiogram products and the PLEUR-EVAC family of chest drainage systems. These products focus on addressing the unique and varied challenges clinicians and patients face in the surgical suite.

UROLOGY AND ENDOUROLOGY

The RUSCH brand of urology products offers a comprehensive line of bladder management products for various urology applications through our Foleys, intermittent catheters and urinary collection devices, as well as products for operative urology and endourology.

CARDIAC CARE

Our cardiac care product range includes technologically advanced left heart products for critically ill cardiac patients and right heart catheter products, including thermodilution and Berman catheters, pacing catheters and transradial access products.
