Pleur-evac® Thoracic Catheters

Soft

The innovative alternative in thoracic catheters featuring softer thermosensitive PVC tubing which can provide less trauma and increased patient comfort.

- Smooth outlet eyes foster optimal drainage
- Sealed blue tip eliminates need to clamp after insertion and can be cut to desired length
- Easy to read depth markings and recessed radiopaque lines aid in and verify placement

FIRM

For the quality and performance you can count on

- Thermosensitive PVC reduces irritation
- Integral funnel tip allows simple attachment to any chest drainage unit
- Optimal drainage outlet eyes, bold depth markings, and recessed radiopaque lines

TROCAR

Designed with safety in mind

- Catheter tip permits easy insertion while reducing risk of trauma
- Bold depth markings and radiopaque lines aid in and verify placement
- Simple trocar withdrawal

Ordering Information

O.D. Size	Straight (Soft)	Straight (Firm)	Right Angle (Soft)	Right Angle (Firm)	Trocar (10")
