Rusch®

Airtraq™ SP Video Laryngoscope System®

Enhancing visualization during routine and complex intubations

Improving visibility, promoting safety and delivering confidence for easier intubation

Call 1.866.246.6990 to place an order

**BENEFITS**

**The Clinician**
Designed to provide visualization during critical intubation procedures

**Your Institution**
Effective way to reduce the risk of cross contamination during intubation

**The Patient**
Facilitates airway access to promote positive patient outcomes

---

**Offers Improved Visibility**
The Rusch® Airtraq™ SP Video Laryngoscope System from Teleflex provides a single-use solution offering users a vantage point from the tip of the laryngoscope blade to better guide their intubation.

The anti-fog system warms the lens to body temperature to minimize fogging during the intubation process. A magnified angular view of the larynx and adjacent structures is captured, inspiring clinician confidence.

The unique design of the Airtraq™ SP Video Laryngoscope System features an anatomical shape and guiding channels to help reduce the learning curve for use and offers a simple way to accurately intubate through the vocal chords.

**Promotes Safety**
Reducing the risk of cross-contamination during intubation is critical. Choosing single-use devices can make all the difference and bring peace of mind to clinicians.

The single-use Airtraq™ SP Video Laryngoscope System is a reliable way to combat intubation infection risk. By reducing the risk of cross contamination, clinicians can be confident they are delivering better care to their patients.

At Teleflex, our driving purpose is to provide innovative technologies to improve the health of patients and support clinicians. The Airtraq™ SP Video Laryngoscope System exemplifies this commitment.

**Delivers Confidence**
Having access to the right product at the right time is vital when facing an immediate need.

The Airtraq™ SP Video Laryngoscope System* delivers a flexible solution to clinicians that is ready to use when they are.

*Video component is sold separately.
**Rusch® Airtraq™ SP Video Laryngoscope System Fast Facts**

- Compatible with Airtraq A360 Wi-Fi Camera to enhance display*
- Anti-fog system warms lens to body temperature
