Ultrasound Guided PICC Insertion Workshop

Teleflex Medical Office | Mascot NSW
5 September 2018

Teleflex

The goal of this workshop is to promote excellence in the insertion and management of PICCs

Learning Objectives

- Align local practice and policies with evidence based research for PICCs
- Determine why and how to select the right device
- Identify, assess and measure vessels using ultrasound
- Describe best vessel selection criteria for PICCs and midlines
- Demonstrate Tip Positioning and Navigation technology
- Demonstrate the modified Seldinger technique for PICC insertion
- Describe steps to successfully complete a PICC exchange
- Demonstrate safe and effective PICC management
- Prevent, detect and effectively manage complications

Facilitators

Joy Blacka

RN, BN, MCP, VA-BC
Certificate IV WT&A
Clinical Consultant
Vascular Access

Joy is a RN with a Masters in Clinical Practice (Vascular Access) and is Vascular Access Board Certified. She has worked and specialised in the field of vascular access for many years and is passionate about improving patient outcomes through engaging with health professionals to increase their critical thinking skills to optimise care of patients requiring a Vascular Access Device. She has extensive experience in the insertion and management of PICCs and the setting up of Nurse led Vascular Teams.
