

ARROW PRESSURE INJECTABLE PICC IN ERGOPACK™ SYSTEM

Comprehensive and easy to use for the inserter

AT A GLANCE

The ARROW Ergonomic Maximal Barrier Precautions Tray is our most comprehensive system. It provides essential tools you need to:

- access your patient's vasculature
- promote compliance to help reduce risk as a result of the ergonomic, comprehensive design
- integrates the latest recommendations from the Centers for Disease Control and Prevention (CDC), the Occupational Safety & Health Administration (OSHA), Institute for Healthcare Improvement (IHI) and National Healthcare Safety Network (NHSN)

It is the ambition of Teleflex to always be one step ahead. Our products are designed, manufactured and distributed for the healthcare customer. Striving for precision in detail to provide safety coupled with the greatest comfort for both patient and caregiver is our mission.

To help you deliver ergonomic care and integrate the latest infection prevention and safety measures recommended by the CDC, IHI, JCAHO, NHSN, OSHA and INS, we have created the ARROW PICC Kit in ErgoPack system.

It includes virtually everything you need to perform a pressure injectable PICC placement – while minimising the risk to your patient and yourself.

PROVEN PROTECTION THANKS TO MAXIMAL BARRIER PRECAUTIONS

According to the Institute for Healthcare Improvement, "... two studies of central line insertions have shown that the application of maximal barrier precautions substantially reduces the odds of developing a bloodstream infection. Mermel et al. demonstrated that the odds ratio was 2,2 times greater for infection without maximal barrier precautions, while Raad et al. demonstrated a 6,3 times greater likelihood for infection without precautions."¹

STAY AHEAD OF RISKS

Inspired by the same concern with safety that has made our central venous catheter kits the industry leader, the ARROW ErgoPack™ provides you with a comprehensive collection of high-quality components designed to prevent infection and sharps-related injuries.

It also puts nearly everything you need for PICC insertion and securement right at your fingertips.

KIT CONTENTS

- ① **Nitinol Spring-Wire guide .018" x 45 cm**
atraumatic and kink resistant
- ② **GlideThru® peelable sheath**
smooth dilator-to-sheath transition
- ③ **Sterile ultrasound probe cover + Gel**
- ④ **Secondsite™ adjustable hub**
fastens catheter at insertion site anywhere along the catheter body
- ⑤ **Maximal Barrier tools**
mask with eye shield, Surgical gown, exclusive easy-to-use head-to-toe drape, fenestrated drape
- ⑥ **Guillotine catheter trimmer**
- ⑦ **Exclusive HemoHopper® fluid receptacle**
conveniently isolates discarded procedural fluids
- ⑧ **SharpsAway II™ locking disposal**
protects the operator from needlestick injuries
- ⑨ **A complete set of documents**
- ⑩ **Sterile gauzes**
- ⑪ **Steri-strips®**
- ⑫ **Transparent dressing**
provides transparency while protects the insertion site
- ⑬ **Filter needle**
- ⑭ **Safety scalpel #11**
- ⑮ **Safety injection needles**
protecting the operator from needlestick injuries
- ⑯ **Sutureless fixation device**
provides atraumatic and stable fixation
- ⑰ **Needle-Free Connectors**
reduce the risk of contamination and blood reflux
- ⑱ **Echogenic insertion needle**
enhanced visibility for ultrasound guided insertion
- ⑲ **Pressure injectable PICC**
- ⑳ **2 10ml luer-lock syringes**
- ㉑ **Tourniquet & tape measure**
