When rapid access is needed
When you’re facing difficult vascular access (DVA) challenges in emergent, urgent or medically necessary situations there should be a safe, effective solution, for immediate vascular access.

The EZ-IO T.A.L.O.N. Tactically Advanced Life-saving IO Needle System which is provided by Teleflex is designed to provide rapid and effective entry into the bone’s medullary cavity, creating a conduit to the central circulation for adult patients when rapid fluid or pharmacological resuscitation is required in emergencies.

The EZ-IO T.A.L.O.N. System is indicated for use in 7 sites: the sternum and bilateral proximal humerus, proximal tibia, and distal tibia.

Benefits

The Medic
Provides rapid and effective entry in the bone

The Army
No need for additional gear, multiple needles or special removal tools

The Patient
Delivers fluids and medications rapidly and accurately for casualty resuscitation
Consult Instructions for Use (IFU) packaged with the product prior to use of this product.
