

Navigate Complex  
Interventions at Every Turn

# Keep Driving Forward

The portfolio of Turnpike® Catheters places the power in your hands. Navigate tortuous anatomy with agility and precision. No matter the challenge, Turnpike Catheters are designed to help simplify the journey.

*"Turnpike® Catheters have a vast utility. They've given me the confidence to tackle a wide variety of highly complex lesions."\**

---

**Jon Robken, MD**  
Cardiovascular Medicine, P.C.

\* This statement reflects the personal experience and opinion of the physician.

# Ideal Combination of Flexibility and Torque Response

Turnpike® Catheters feature a unique five-layer shaft construction that provides flexibility, torque and tracking over a 0.014" guidewire in complex coronary interventions.

## Outmaneuver Roadblocks

- + Complex lesions
- + Extreme tortuosity
- + Guidewire support

### Enhanced Guidewire Movement

An inner PTFE liner that spans the entire catheter to ensure smooth guidewire interaction throughout the case

### Responsive and Kink Resistant

Dual-layer coils and a braid make for an ideal combination of flexibility and torque response

### Exceptional Delivery

A polymer outer layer, paired with a hydrophilic coating on the distal 60 cm, provides excellent lubricity for delivery

#### Turnpike® LP

*Dual coil tapers down to single coil 21 cm from distal tip for lower profile and increased flexibility in the distal shaft and tip*

ANTEGRADE | RETROGRADE

**Turnpike**<sup>®</sup>  
catheter

## Standard version, flexible tip

Workhorse antegrade device, as well as retrograde escalation device for increasing torque power and guidewire support<sup>1</sup> in resistant septal collaterals

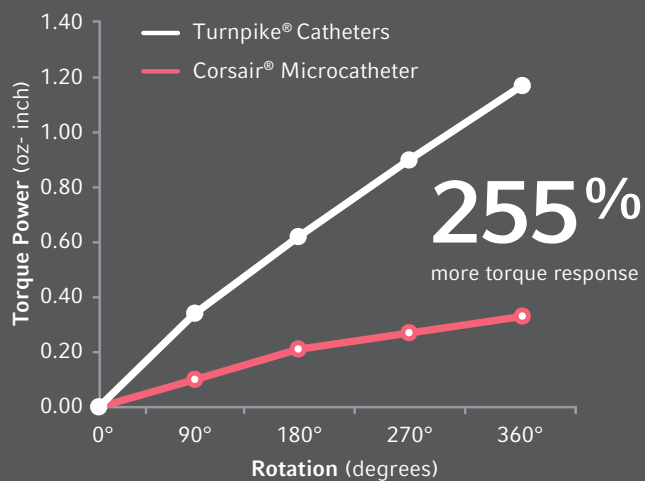

5-layer shaft construction includes dual-layer coils and a braid for an ideal combination of flexibility and torque response

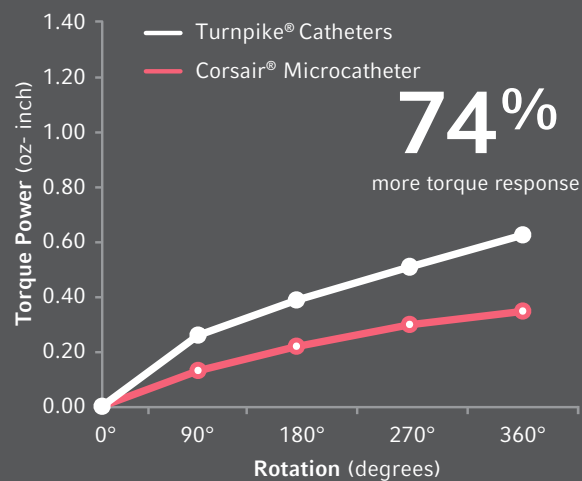

## Superior Bidirectional Torque Response\*

Clockwise Torque Test

Counter-Clockwise Torque Test

\* All values based on bench test data averages, n=3, performed by Teleflex. Bench test results may not necessarily be indicative of clinical performance. Data on file.

Packaged in quantities of 1 unit per box.

# Turnpike<sup>®</sup> Spiral catheter

## Spiral shaft, flexible tip

Front-line device for complex  
antegrade interventions

Same shaft design as the standard  
version with the addition of a 2 cm  
outer nylon coil for added rotational  
advancement when rotated in  
a clockwise direction

## Turnpike® Catheters

The Turnpike® Catheters are intended to be used to access discrete regions of the coronary and/or peripheral vasculature. They may be used to facilitate placement and exchange of guidewires and to subselectively infuse/deliver diagnostic and therapeutic agents.

The Turnpike® Spiral and Turnpike® Gold catheters are contraindicated for use in vessels with an effective diameter smaller than 1 mm.

Teleflex is a global provider of medical technologies designed to improve the health and quality of people's lives. We apply purpose driven innovation – a relentless pursuit of identifying unmet clinical needs – to benefit patients and healthcare providers. Our portfolio is diverse, with solutions in the fields of vascular and interventional access, surgical, anesthesia, cardiac care, urology, emergency medicine and respiratory care. Teleflex employees worldwide are united in the understanding that what we do every day makes a difference. For more information, please visit [teleflex.com](http://teleflex.com).

Teleflex is the home of Arrow®, Deknatel®, Hudson RCI®, LMA®, Pilling®, Rüschi®, and Weck® – trusted brands united by a common sense of purpose.
