The Single-Use, First-Generation LMA® Airway with a Silicone Cuff

A Versatile First-Generation Laryngeal Mask
The LMA® Unique™ (Silicone Cuff) Airway with Cuff Pilot™ Technology from Teleflex is a versatile, single-use, first-generation laryngeal mask with a medical-grade silicone cuff. Designed for patient comfort, the silicone cuff is soft and flexible, and conforms to the anatomy to create an effective oropharyngeal seal. The LMA® Unique™ (Silicone Cuff) Airway is an ideal choice for routine anesthetic procedures, for difficult airway situations, or for airway management during cardiopulmonary resuscitation. Its single-use design avoids the cleaning and sterilization costs associated with reusable devices, and may help to reduce the risk of cross-contamination.

Cuff Pilot™ Technology
The LMA® Unique™ (Silicone Cuff) Airway is available with Cuff Pilot™ Technology – an integrated, single-use cuff pressure indicator that constantly monitors cuff pressure, detecting changes resulting from fluctuations in temperature, nitrous oxide levels and movements within the airway. It provides at-a-glance feedback, highlighting changes that could affect patient safety.

Cuff Pilot™ Technology was developed to support clinicians in avoiding the known risks of cuff hyperinflation, which include sore throat, dysphagia, an increased risk of aspiration due to leakage around the cuff, and hypoglossal, lingual or recurrent laryngeal nerve palsies.

Benefits
- **The Patient**
  Soft, medical-grade silicone cuff designed for patient comfort
- **Your Institution**
  Suited for areas where a reusable device is not practical, economical or desired
- **The Clinician**
  Indicated for use in a wide range of clinical situations

The LMA® Unique™ (Silicone Cuff) Airway with Cuff Pilot™ Technology from Teleflex is a versatile, single-use, first-generation laryngeal mask with a medical-grade silicone cuff. Designed for patient comfort, the silicone cuff is soft and flexible, and conforms to the anatomy to create an effective oropharyngeal seal. LMA® Unique™ (Silicone Cuff) Airway with Cuff Pilot™ Technology

Aperture Bars
- Designed to prevent the blockage of airflow by the epiglottis

Silicone Cuff
- Soft and flexible, and conforms to the anatomy

Cuff Pilot™ Technology
- An integrated, single-use cuff pressure indicator that constantly monitors cuff pressure

Connector
- Standard 15 mm connector

Yellow Zone
- 0–40 cm H₂O

Green Zone
- 40–60 cm H₂O

Clear Zone
- 60–70 cm H₂O

Red Zone
- 70+ cm H₂O

LMA® Unique™ (Silicone Cuff) Airway with Cuff Pilot™ Technology Fast Facts

Combines all of the features of the LMA® Unique™ Airway with the added benefits of a silicone cuff and integrated cuff pressure monitoring.

Silicone cuffs are better able to mold into shape, compared with PVC cuffs, and this may result in improved airway sealing characteristics.

Supplied sterile for single use, and available with or without Cuff Pilot™ Technology in sizes 1–6.
