OnControl® Powered Bone Marrow Biopsy System
In Control With OnControl*: Moving the Needle

The Arrow® OnControl® Powered Bone Marrow Biopsy System is an innovative, powered solution that raises the standard for biopsies and aspirations as compared to manual biopsy needles.

**For Practitioners**
Provides increased control when accessing and extracting core specimens.

**For Pathologists**
More usable specimen area for diagnosis.

**For Patients**
Demonstrated to cause less pain during insertion and after the procedure, as compared to manual biopsy needles.

---

**High-Quality Samples**
- As compared to manual biopsy needles, the Arrow® OnControl® Powered Bone Marrow Biopsy System has been shown to deliver consistently larger, high-quality core specimens.
- This may reduce the number of second-attempt procedures required that can occur as a result of insufficient specimen size and may result in more usable area for diagnosis.

**Increased User Control**
- Helps to effectively, safely, and rapidly obtain specimens.
- Easy to use, regardless of physical strength.
- May result in a procedure that is up to 55% faster than with manual biopsy needles.

**Dependable Performance**
- Specially designed, threaded cannula grabs and holds core specimens.
- Comprehensive system trays contain the instruments needed for multiple, high-quality bone biopsies from a single penetration.

**Less Patient Pain**
- Has been demonstrated to cause less patient pain, during insertion and after the procedure, as compared to manual biopsy needles.
- Reduced pain can help promote patient compliance with ongoing testing.

---

**We’re With You Every Step of the Way**
Backed by our experienced clinical training staff, the Arrow® OnControl® Powered Bone Marrow Biopsy System is raising the standard for biopsies and aspirations for cancer centers and interventional radiologists.
