

D-Stat Rad-Band
topical hemostat

MORE THAN JUST A RADIAL COMPRESSION BAND

Utilizing the power of thrombin

The D-Stat Rad-Band contains the power of thrombin in a familiar D-Stat Dry pad. The easy release clasp promotes single-operator pressure adjustments. The foam pads are also adjustable for additional patient comfort.

SOLUTIONS

D-Stat® Rad-Band®

topical hemostat

Model	Description	Box Quantity*
3501R	D-Stat Rad-Band topical hemostat	10

*Devices packaged in quantities of 10 units per box. Individual units are not sold separately.

The D-Stat Rad-Band topical hemostat is applied topically and is indicated for the control of surface bleeding from vascular access sites and percutaneous catheters or tubes.

WARNING: SEVERE BLEEDING AND THROMBOSIS COMPLICATIONS

- THROMBIN- JMI can cause fatal severe bleeding or thrombosis. Thrombosis may result from the development of antibodies against bovine thrombin. Bleeding may result from the development of antibodies against factor V. These may cross-react with human factor V and lead to its deficiency.
- Do not re-expose patients to THROMBIN-JMI if there are known or suspected antibodies to bovine thrombin and/or factor V.
- Monitor patients for abnormal coagulation laboratory values, bleeding, or thrombosis.

The D-Stat Rad-Band is contraindicated in persons with known sensitivity to bovine-derived materials.

Please see the Instructions for Use for a complete listing of the indications, contraindications, warnings and precautions.

CAUTION: Federal law (U.S.A.) restricts this device to sale by or on the order of a physician.
