WECK®
Auto Endo5®
Automatic Clip Applier

**Greater confidence**
The Weck Auto Endo5 Automatic Clip Applier provides greater confidence in secure occlusion using Weck Hem-o-lok® Polymer Ligation Clips. Its innovative design keeps each clip seated in the applier jaws during application and delivers enhanced clip retention on the chosen structure.

**Secure-locking clip technology**
Hem-o-lok Clips deliver unparalleled ligation security compared to leading competitors,* thanks to their integrated ridges and proprietary distal locking mechanism. The M/L clip has a clip aperture of 4.9 mm and a closed clip length of 9.2 mm.

**Procedural flexibility**
With its ergonomic design, longer shaft, and 15 Hem-o-lok M/L Clips—the only clips indicated for ligating up to a 10 mm vessel or tissue structure through a 5 mm port—the Auto Endo5 Clip Applier increases procedural flexibility.

---

**BENEFITS**

**The Clinician**
The Hem-o-lok Clip’s integrated ridges and distal locking mechanism provide unparalleled clip security compared to leading competitors.*

**Your Institution**
Cost-savings opportunity compared to leading auto endo 5 mm metal clip appliers.

**The Patient**
Flexible clip hinge enables ligation of up to a 10 mm structure through a 5 mm port, helping to minimize patient trauma.
Data on file (2013 internal study), Teleflex Incorporated, Report #D001591. Based on ex-vivo testing of three common clip failure modes conducted on porcine carotids, sample size = 33, p≤0.05. Clinical performance cannot be extrapolated from the data. Testing pressures range beyond physiological pressures. The Weck ® Hem-o-lok ® medium/large clip was compared to Ethicon ® LIGAMAX ™ , Ethicon ® 10 mm LIGACLIP ® , and Covidien ® Endo Clip ™ III. The Weck ® Hem-o-lok ® large clip was compared to Ethicon ® 12 mm LIGACLIP ® and Covidien ® Endo Clip ™ .

Hem-o-lok Ligating Clips are contraindicated for use as a fallopian contraceptive tubal occlusion device and contraindicated for use in ligating the renal artery during laparoscopic donor nephrectomies.

### Weck® Auto Endo5® Automatic Clip Applier Features

<table>
<thead>
<tr>
<th>Feature</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>5 mm shaft</td>
<td>Lessens trauma to the patient compared to 10 mm appliers</td>
</tr>
<tr>
<td>35 cm shaft length</td>
<td>Makes it the longest available automatic endoscopic clip applier on the market for enhanced reach and procedural flexibility</td>
</tr>
<tr>
<td>Delivers 15 Weck Hem-o-lok® M/L Polymer Ligation Clips</td>
<td>Indicated for ligating up to a 10 mm vessel or tissue structure through a 5 mm port</td>
</tr>
<tr>
<td>Last clip lockout</td>
<td>Delivers an orange tab into applier jaws to clearly indicate when empty</td>
</tr>
</tbody>
</table>

---

### Weck Hem-o-lok Clip Features

- Integrated ridges: Designed to prevent slippage with a reliable 360° grip
- Locking mechanism: Provides secure closure with tactile and auditory feedback
- Three points of contact: in the applier jaws for enhanced stability
- Flexible hinge: Enables 10 mm structure ligation through a 5 mm port
- Bow shape: For easy removal with appropriate instrument
