ARROW® NEXTSTEP® ANTEGRADE

The next step in dialysis catheter technology
STEP-TIP EASE MEETS SPLIT TIP FLOW

THE ARROW NEXTSTEP ANTEGRADE IS A CHRONIC HEMODIALYSIS CATHETER DESIGNED TO COMBINE:

- A step-tip catheter’s ease of insertion
- A split-tip catheter’s sustained high flow

EASE OF INSERTION

The Arrow NextStep Antegrade’s unique tip is designed for:

- Smooth transition of over-the-wire insertion and exchanges
- Smooth transition through a sheath

DESIGNED FOR SUSTAINED HIGH FLOW AND MINIMAL RECIRCULATION

To reduce recirculation and deliver high flow, the Arrow NextStep Antegrade’s tip has two unique, complementary features:

- The ports are reversed to take better advantage of blood flow dynamics
  - The venous port releases blood in the SVC
  - The arterial port draws blood from the right atrium
  - Side holes on the tip are designed to pull blood from all sides
- The ports are significantly separated to both enhance flow and minimize recirculation

ENGINEERED FOR HIGH FLOW

![Graph showing pressure vs. flow](chart.png)

- Arterial Pressure
- Venous Pressure

ARterial PORT

Designed to optimize flow by residing in the right atrium; side holes engineered to pull blood from all sides

VENous PORT

Significant separation from arterial port enhances flow and minimizes recirculation

EASY TO INSERT

Designed for smooth transition through sheath and over-the-wire insertion
**FEATURED KIT COMPONENTS**

*Arrow SmartSeal® Hemostatic Peelable Dialysis Sheath*
- Designed to minimize risk of air embolism and clinicians’ exposure to bloodborne pathogens.

*Arrow Simplicity® Color-Coded Micro-Puncture Introducer Set*
- Unique system designed to simplify catheterization and facilitate optimal placement. Corresponds to color-coded packaging for Arrow NextStep chronic hemodialysis catheters.

**ALCOHOL-COMPATIBLE CONSTRUCTION**
For use with a broad spectrum of agents, including Chloraprep® and iodine.

**REVERSED PORTS**
To help deliver sustained high flow, the Arrow NextStep’s ports are reversed: The venous port resides in the SVC, the arterial port in the right atrium.
THE ARROW NEXTSTEP ANTEGRADE HEMODIALYSIS CATHETERIZATION SET INCLUDES:

1 Catheter: 15 Fr.
1 Arrow SmartSeal® Hemostatic Peelable Dialysis Sheath: 16 Fr.
1 Spring-Wire guide: .038” (.97 mm) x 39-1/2” (100 cm) straight stiff tip on one end—“J” tip on other with Arrow Advancer®
1 Introducer needle: 18 Ga. x 2-1/2” (6.35 cm)
1 Pre-loaded tunneler (metal) with Tunneling Sheath
2 Luer-Lock caps
1 Dressing: Tegaderm®10 cm x 12 cm
1 Tissue dilator: 12 Fr.
1 Tissue dilator: 14 Fr.
1 SharpsAway II™ Locking Disposal Cup
1 Safety scalpel: #11
1 Patient ID card
### ARROW NEXTSTEP® ANTEGRADE CHRONIC HEMODIALYSIS CATHETER SETS WITH ARROW SIMPLICITY® COLOR-CODED MICRO-PUNCTURE INTRODUCER

Teleflex is a global provider of medical products designed to enable healthcare providers to protect against infections and improve patient and provider safety. The company specializes in products and services for vascular access, respiratory, general and regional anesthesia, cardiac care, urology and surgery. Teleflex also provides specialty products for device manufacturers.

The Teleflex family of brands includes ARROW®, BEERE MEDICAL®, DEKNATEL®, GIBECK®, HUDSON RCI®, KMEDIC®, PILLING®, PLEUREVAC®, RÜSCH®, SHERIDAN®, SMD®, TAUT®, TFX OEM®, VASONOVA® and WECK®, all of which are trademarks or registered trademarks of Teleflex Incorporated or its affiliates. Teleflex Incorporated (NYSE:TFX) has annual revenues of approximately $1.8 billions and customers in more than 130 countries.
