A NEW AGE OF POWERED PRECISION.

The ARROW® OnControl® Powered Bone Lesion Biopsy System is the first major advance in bone and bone marrow sampling procedures in over 40 years, providing the ability to effectively, safely, and rapidly obtain high quality specimens, even from hard bone. Our bone lesion biopsy needle is designed specifically for multiple bone biopsies from a single cortical penetration.

BONE LESION BIOPSY TRAY COMPONENTS

- Bone Access Needle Set
- Bone Access Ejector Rod
- Bone Lesion Biopsy Needle
- Bone Lesion Biopsy Ejector Rod
- Connector with Sterile Sleeve
- Manual Handle – for minor adjustment
- Transfer Rod – for marking the access point

Potential complications may include local or systemic infection, hematoma, extravasation or other complications associated with percutaneous insertion of sterile devices. Rx only. Refer to instructions accompanying the device for indications, contraindications, warnings, and precautions.

Using patented handheld driver technology, the ARROW® OnControl® Powered Bone Lesion Biopsy System provides interventional radiologists a fast, reliable solution for accessing dense and hard-to-reach bone lesions.

- **Reduced radiation** for patient and operator¹
- **Improved control**² for difficult access lesions

Specially engineered cannula makes access to hard bones easy.

**Power Driver** accelerates access.

**RAPID ACCESS**¹ to difficult bone lesions

**PRECISE CONTROL** with clear visibility through fluoroscopy²

**HIGH QUALITY** core biopsy specimens, quickly and consistently³

**55% FASTER** procedure time to improve efficiency⁴

The bone lesion biopsy tray contains the instruments needed for multiple, high quality bone biopsies, from a single cortical penetration.
