Navigate Complex Interventions at Every Turn
Keep Driving Forward

The portfolio of Turnpike® Catheters places the power in your hands. Navigate tortuous anatomy with agility and precision. No matter the challenge, Turnpike Catheters are designed to help simplify the journey.

"Turnpike® Catheters have a vast utility. They’ve given me the confidence to tackle a wide variety of highly complex lesions."*

Jon Robken, MD
Cardiovascular Medicine, P.C.

Ideal Combination of Flexibility and Torque Response

Turnpike® Catheters feature a unique five-layer shaft construction that provides flexibility, torque and tracking over a 0.014" guidewire in complex coronary interventions.

Outmaneuver Roadblocks

+ Complex lesions
+ Extreme tortuosity
+ Guidewire support

Enhanced Guidewire Movement

An inner PTFE liner that spans the entire catheter to ensure smooth guidewire interaction throughout the case

Responsive and Kink Resistant

Dual-layer coils and a braid make for an ideal combination of flexibility and torque response

Exceptional Delivery

A polymer outer layer, paired with a hydrophilic coating on the distal 60 cm, provides excellent lubricity for delivery

* This statement reflects the personal experience and opinion of the physician
**Standard version, flexible tip**

Workhorse antegrade device, as well as retrograde escalation device for increasing torque power and guidewire support¹ in resistant septal collaterals.

Smooth Tip
- 60 cm hydrophilic coating
- Gold-plated stainless steel

135 cm / 150 cm lengths

Spiral Shaft
- 0.97 mm (2.9 Fr.)
- 2 cm outer coil

Spiral, flexible tip
Front-line device for complex antegrade interventions
Spiral shaft, threaded metal tip
Antegrade escalation device for resistant lesions

Gold-plated threads on distal tip provide leading edge rotational advancement with visibility under fluoroscopy.
Turnpike® LP Catheter offers impressive torqueability with a smaller crossing profile than the Corsair® Microcatheter.

- **Dual-to-single coil transition 21 cm from distal tip** for lower profile and increased flexibility in the distal shaft and tip.

Turnpike® Catheters

The Turnpike® Catheters are intended to be used to access discrete regions of the coronary and/or peripheral vasculature. They may be used to facilitate placement and exchange of guidewires and to subselectively infuse/deliver diagnostic and therapeutic agents.

The Turnpike® Spiral and Turnpike® Gold catheters are contraindicated for use in vessels with an effective diameter smaller than 1 mm.

Teleflex is a global provider of medical technologies designed to improve the health and quality of people’s lives. We apply purpose driven innovation – a relentless pursuit of identifying unmet clinical needs – to benefit patients and healthcare providers. Our portfolio is diverse, with solutions in the fields of vascular and interventional access, surgical, anesthesia, cardiac care, urology, emergency medicine and respiratory care. Teleflex employees worldwide are united in the understanding that what we do every day makes a difference. For more information, please visit teleflex.com.

Teleflex is the home of Arrow®, Deknatel®, Hudson RCI®, LMA®, Pilling®, Rüsch®, and Weck® – trusted brands united by a common sense of purpose.
